ABOUT MAINE COIN

Redefining meme coins by helping animals in the chain

In the ever-evolving world of cryptocurrencies, Maine Coin is a distinctive and innovative token that draws inspiration from the beloved meme coin universe with the theme of helping and protecting pets, while simultaneously introducing an innovative measurement of online staking as well as the potential for use in a future application.

With a new ethos of “Even Animals Need Protection,” Maine Coin is proud to expand on this by not only embracing its philanthropic spirit, but also revolutionizing the concept of helping animals and shelters by creating a phone app that provides all the necessary actions and abilities.

The Maine Coin token or COON for short, made on the BEP-20 network.

Contract address:

0x8368B15fFbb174F1609000EA88aa0C86d60B6E8F

The total supply is:

100,000,000,000 COON

Embracing tradition, igniting innovation:

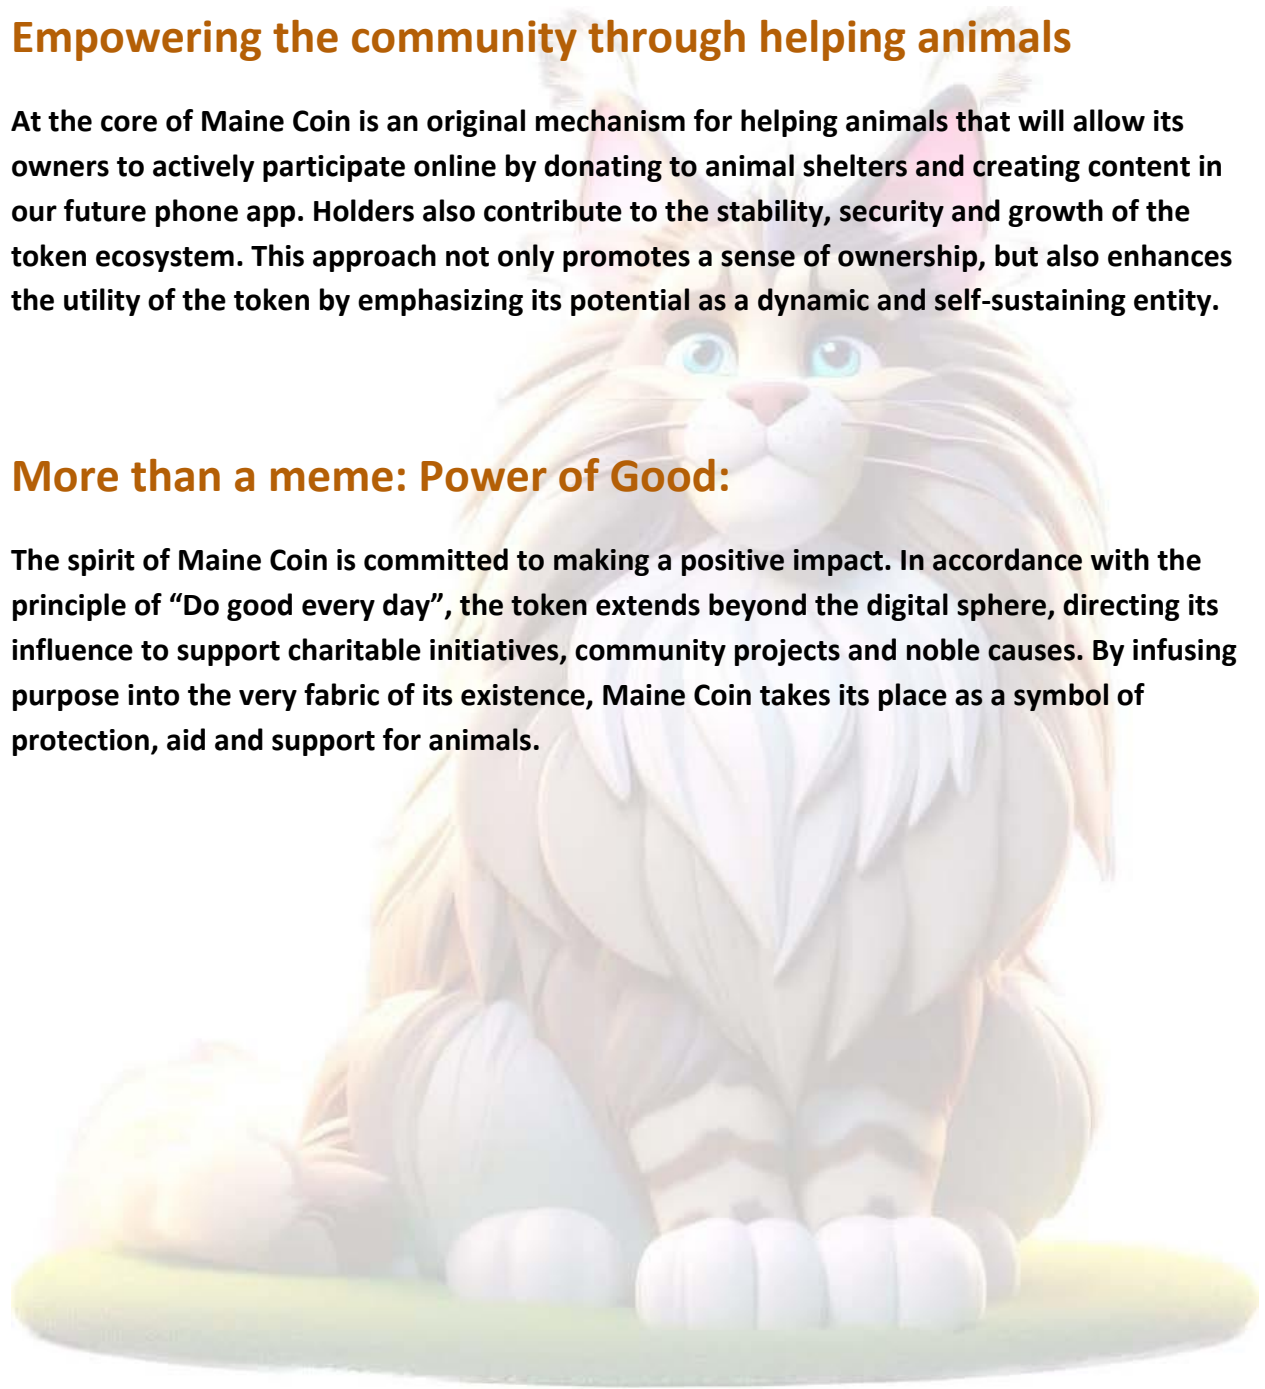

Maine Coin embodies the vibrant essence of meme coins that will capture the imagination of the crypto community. The Maine Coin's roots will intertwine with famous other coins and transcend internet and meme coin culture. Maine Coin pays tribute to all pets, with the goal of helping them, protecting them, and adding the opportunity to leave their mark on the blockchain. By combining the appeal of memes with the power of online staking, Maine Coin is forging a unique path that attracts both enthusiasts and investors looking for new ways to grow, as well as philanthropists willing to help animals.

Empowering the community through helping animals

At the core of Maine Coin is an original mechanism for helping animals that will allow its owners to actively participate online by donating to animal shelters and creating content in our future phone app. Holders also contribute to the stability, security and growth of the token ecosystem. This approach not only promotes a sense of ownership, but also enhances the utility of the token by emphasizing its potential as a dynamic and self-sustaining entity.

More than a meme: Power of Good:

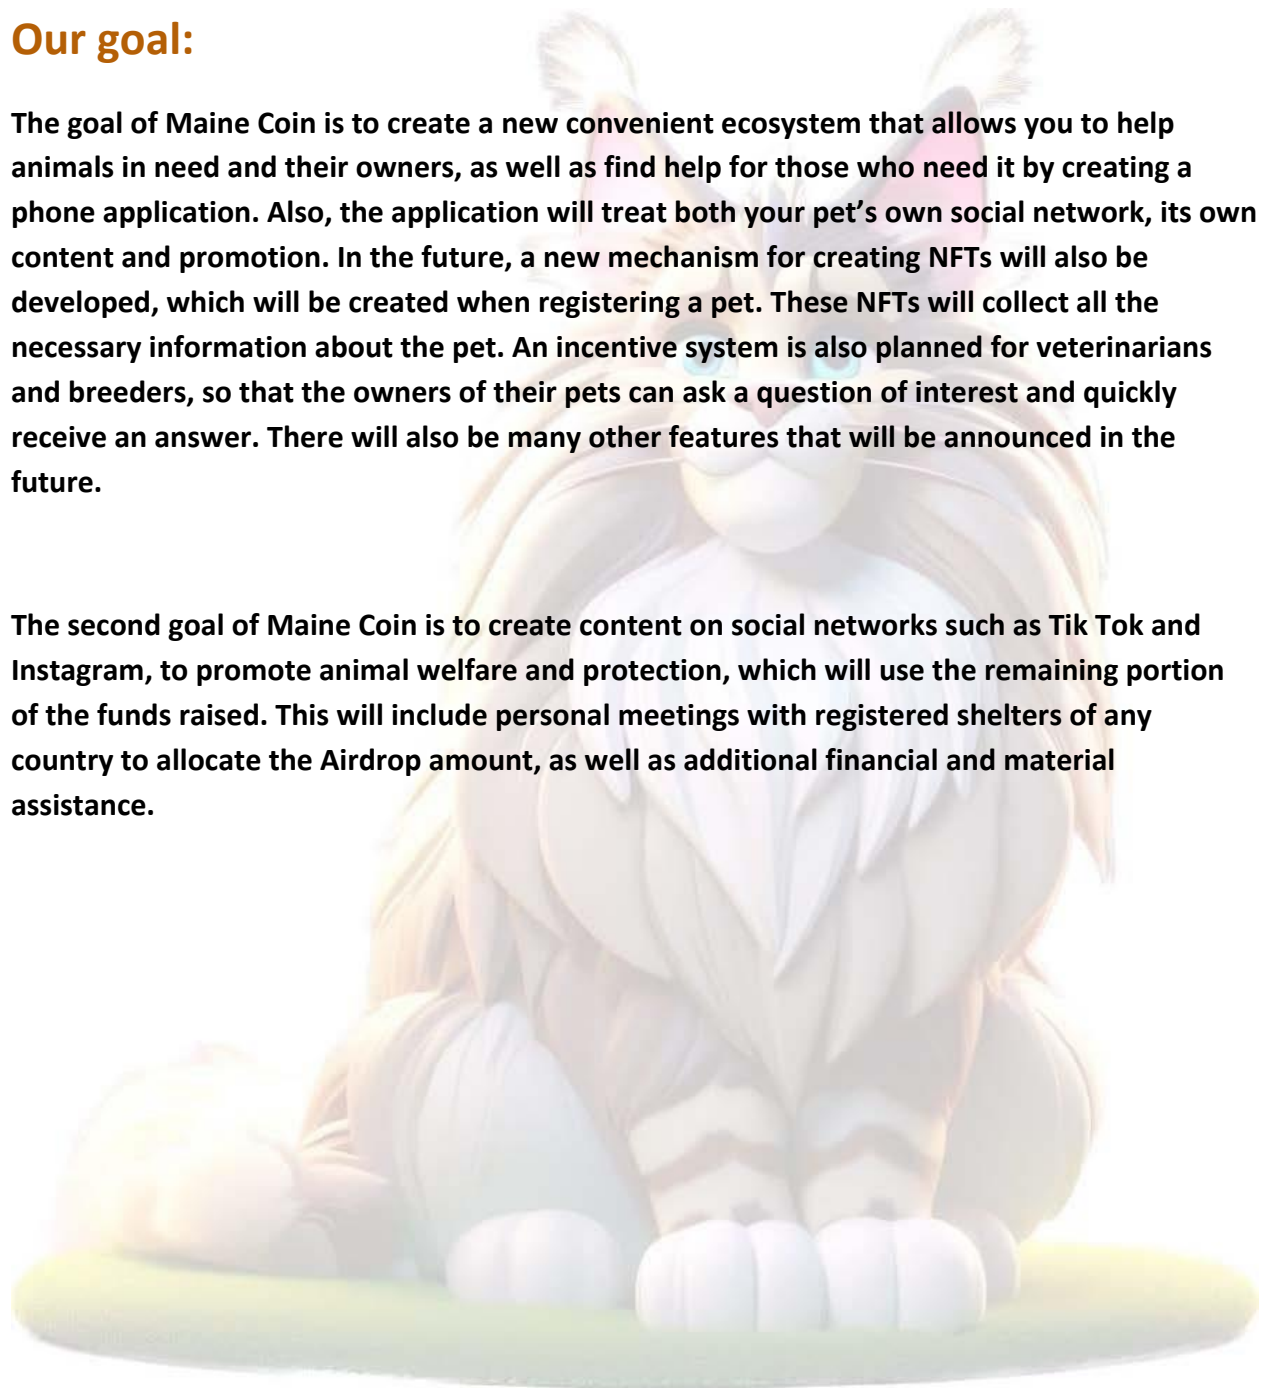

The spirit of Maine Coin is committed to making a positive impact. In accordance with the principle of “Do good every day”, the token extends beyond the digital sphere, directing its influence to support charitable initiatives, community projects and noble causes. By infusing purpose into the very fabric of its existence, Maine Coin takes its place as a symbol of protection, aid and support for animals.

Our goal:

The goal of Maine Coin is to create a new convenient ecosystem that allows you to help animals in need and their owners, as well as find help for those who need it by creating a phone application. Also, the application will treat both your pet's own social network, its own content and promotion. In the future, a new mechanism for creating NFTs will also be developed, which will be created when registering a pet. These NFTs will collect all the necessary information about the pet. An incentive system is also planned for veterinarians and breeders, so that the owners of their pets can ask a question of interest and quickly receive an answer. There will also be many other features that will be announced in the future.

The second goal of Maine Coin is to create content on social networks such as Tik Tok and Instagram, to promote animal welfare and protection, which will use the remaining portion of the funds raised. This will include personal meetings with registered shelters of any country to allocate the Airdrop amount, as well as additional financial and material assistance.

The Future of Maine Coin:

Maine Coin envisions a future where innovation meets compassion, where tokens inspired by memes and helping animals transcend internet trends, and where contributions become meaningful. As the crypto landscape continues to evolve, Maine Coin is poised to redefine norms, challenge conventions, and pave the way for a more inclusive and efficient blockchain ecosystem where pets can participate.

Maine Coin plans to create its own social network for pets under the management of their owners, which will have more opportunities to protect animals and provide various services in order to provide a better life for animals and their owners. Services will include:

1. **Buying and selling pets.**
2. **Purchase and sale of goods for pets.**
3. **The ability to view the location of veterinarians, shelters and breeders on a map, as well as view their services.**
4. **Possibility of registration at the nearest veterinary clinic.**
5. **Opportunity to see shelter animals and breeders.**
6. **Opportunity to make donations to the shelter,**
7. **Opportunity to ask questions to veterinarians and breeders of all countries, which will be rewarded with the COON token for efficiency.**
8. **Possibility of creating your pet's own NFT.**
9. **The ability to create your own social life for your pet, as well as your own content.**

Our desire is to increase the owner's attention to his beloved pet, creating meaning and interest for this, as well as possible income. At the same time, provide them with protection and assistance. We also want to create a new system where personal NFTs of the pet will be created based on the parameters of the pet, and also come up with ways to use them in the future to simplify the transfer of pet information and give them the opportunity to leave their mark on the blockchain.

02.

Roadmap:

Our path to success

ROADMAP

Stage 1: Closed sale and preparation (Private Sale)

Maine Coin begins its journey with a private coin sale to ensure a level playing field for all investors through a fair and transparent pre-sale. Part of the funds raised during the private sale will be used to develop a professional and comprehensive marketing strategy, as well as to legally register the project and create a team. This strategy will lay the foundation for wider awareness and adoption, setting the stage for the token's future growth.

Stage 2: Pre-sales, development, marketing, partnership (ISO)

Pre-sale of the allocated percentage of COON, which will consist of 5 stages. During the pre-sale, an easy-to-use phone application will be developed, which will have all the features to help and protect animals, from health to entertainment content.

Also, partnerships will be concluded with companies that value the health of pets.

Stage 3: Creating an application and listing on decentralized exchanges (DEX)

This stage will be the beginning of creating an application on the phone and will continue until the end of all stages of the roadmap.

In this application you will be able to:

1. Buy a pet or look at pet options from your nearest shelter.
2. Make a donation to the shelter or animal owners who need it.
3. Contact a veterinarian or veterinary clinic with the possibility of rewards for the response, as well as registration for an appointment if necessary.
4. Create a profile for your pet with your own content that will be rewarded when promoted.
5. Possibility of payment via cryptocurrency within the application for the purchase and sale of animals, as well as all necessary things for animals.
6. Creation of a separate COON crypto-wallet, which will contain savings for the necessary assistance to animals in need under certain conditions.
7. Completing various tasks with animals that will be rewarded with the COON token.

In the future, it is also planned to develop your own NFT for your pet, which will contain all the necessary information and parameters about it, such as: breed, age, weight, height, pedigree and more. Also, various developments of using NFTs for the benefit of pets are planned.

Also at this stage, the coin will be added to all possible decentralized exchanges.

Stage 4: Registration on centralized exchanges and provision of dedicated liquidity

Continuing to strive to create a robust ecosystem, the Maine Coin team is devoting a significant portion of its resources to adding liquidity to the pool. This provision of liquidity is made possible by allocating 10% of the total number of tokens. This move ensures that the token maintains healthy trading volumes and minimizes potential volatility, protecting the interests of both early and future investors.

Stage 5: Long-term bet on passive rewards

As Maine Coin strengthens its presence in the crypto space, the focus shifts to providing sustainable value and rewards to its holders. This feature allows token holders to participate in long-term staking by generating passive rewards based on a proven and reliable model.

Step 6: Create Your Own Maine Coin Content

At this stage, the entire remaining portion of the collected pre-sale funds will be allocated to create content on various social networks. Our team will personally meet with shelters from different countries and will make donations in the form of our COON coin and financial support collected from pre-sales to help promote and market our application, as well as the shelter itself. During the process, you will be required to register for our application and learn how to use it.

Stage 7: Application development and development

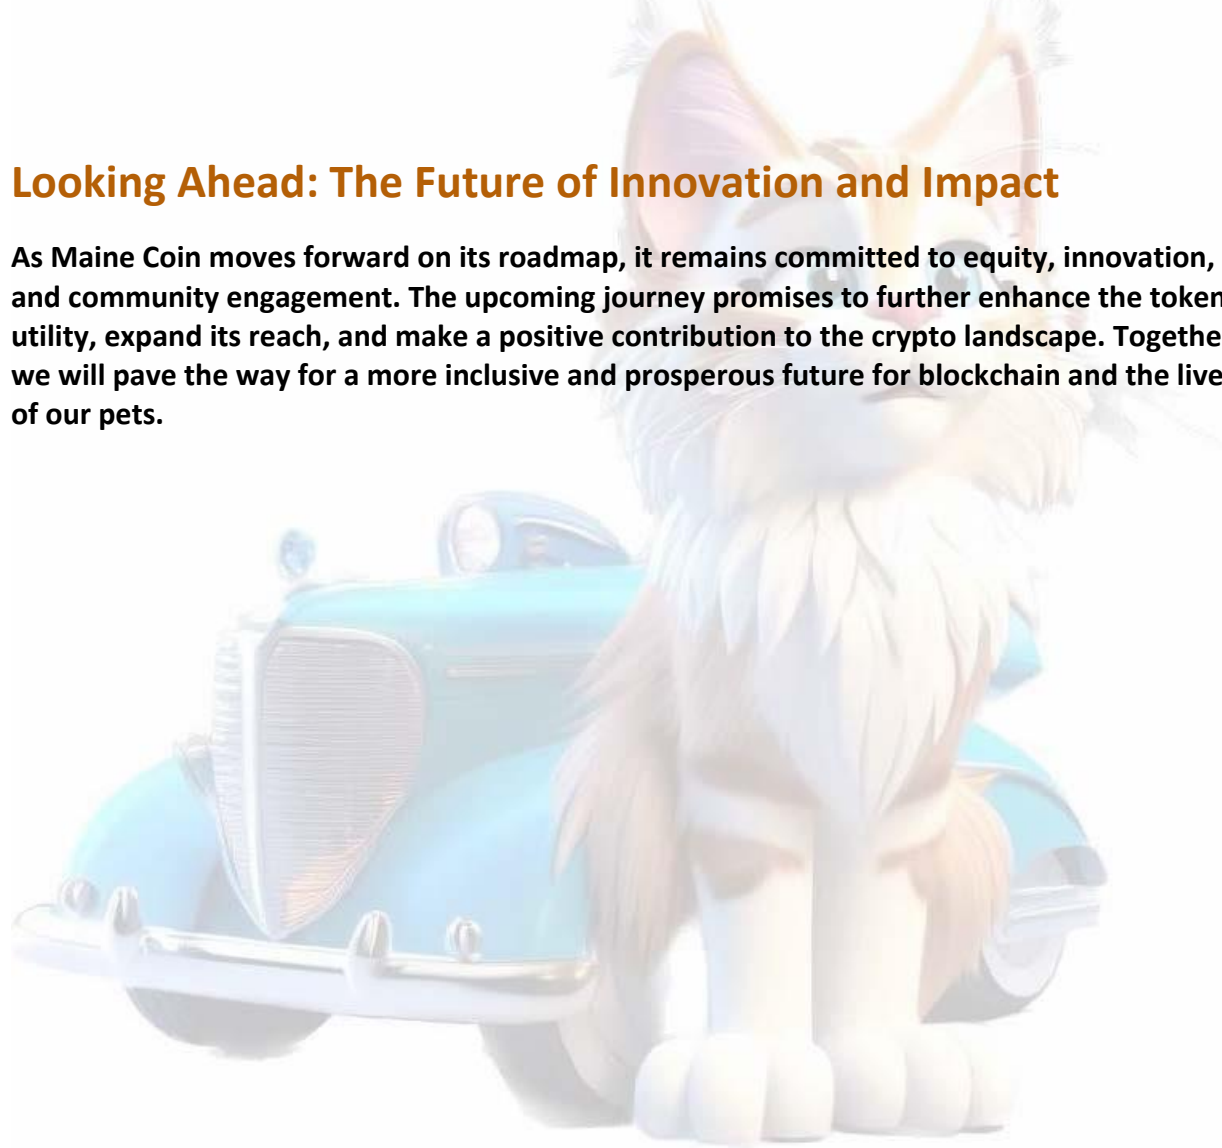

This phase will look at developing new uses for pet NFTs. NFTs will store all the necessary data and parameters of the pet.

Stage 8: Artificial Intelligence

At this stage, all information about animals will be collected, which will be stored in our project, such as answers to questions from breeders and veterinarians, so that in the future, our artificial intelligence can itself answer questions of interest regarding a particular pet, including the pet's breed, nutrition, weaknesses, activity, health and much more.

Looking Ahead: The Future of Innovation and Impact

As Maine Coin moves forward on its roadmap, it remains committed to equity, innovation, and community engagement. The upcoming journey promises to further enhance the token's utility, expand its reach, and make a positive contribution to the crypto landscape. Together we will pave the way for a more inclusive and prosperous future for blockchain and the lives of our pets.

TOKENOMICS

COON token distribution

TOKENOMICS:

Fostering growth and sustainability

Token distribution:

Private Sale: 3.00% (3,000,000,000 COON Tokens)

Early round investment phase.

The main goal is to obtain funding for the further development of the project: creating a marketing team, a website, financing the first advertising campaigns and registering the project on other well-known sites, as well as legal registration as a company.

Pre-sale: 27.00% (27,000,000,000 COON Tokens)

The pre-sale phase makes up a significant portion of the initial token distribution, providing a fair entry point for early backers and investors. This distribution will empower those who believe in Maine Coin's vision and want to actively participate in its development from the very beginning.

Marketing: 10.00% (10,000,000,000 COON Tokens)

The key to Maine Coin's future success will be a comprehensive marketing campaign targeting active meme coin traders and attracting long-term supporters. Maine Coin will be visible on all major cryptocurrency traffic platforms.

Treasury: 10.00% (10,000,000,000 COON Tokens)

This reserve is intended to support the long-term sustainability and development of the project by providing financial resources for future efforts and operational needs.

Staking: 10.00% (10,000,000.00 COON Tokens)

A significant portion of the tokens are dedicated to staking, which incentivizes holders to contribute to the stability and growth of the network while receiving rewards. This distribution encourages active participation and reinforces the community-driven nature of Maine Coin.

DEX Liquidity: 10.00% (10,000,000,000 COON Tokens)

Recognizing the importance of liquidity to a thriving ecosystem, Maine Coin allocates a portion of its tokens to provide liquidity on decentralized exchanges. This initiative improves the trading experience, maintains price stability and ensures smoother market functioning.

Animal Assistance Insurance Account: 5.00% (5,000,000,000 COON Tokens)

5% of the total supply of COON tokens will be donated to help animals in need. These funds will be available to pet owners who are registered in the Maine Coin application and actively use it. These funds will be allocated for urgent health care for your pet. Also, 25% of the profit will be allocated to this account to ensure the continuity of this service.

Airdrop For Pet Shelters: 20.00% (20,000,000,000 COON Tokens)

This Airdrop will be shared among shelters that register for the airdrop in the Maine Coin App. It will be issued personally, regardless of location or country, for the creation of animal assistance content, marketing and test registration in the application. The conditions for distribution and participation in this airdrop will be more precisely established after the completion of the Private Sale.

5,000,000,000 COON coins from this airdrop will go towards in-app incentive rewards for activity.

Airdrop: 5.00% (5,000,000,000 COON Tokens)

5% of the total will be distributed to active Maine Coin project participants who helped with marketing, design and dissemination of information about our project. More precise details will be provided after the Private Sale is completed.

04.

STAKING:

Unlocking a passive ability.

Rewards with Maine Coin.

STAKING:

Unlocking a Passive Ability

Rewards with Maine Coin

At the heart of Maine Coin is an innovative staking mechanism that allows the community to not only actively participate, but also generate passive rewards. By leveraging the power of your COON tokens, you can seamlessly participate in this rewarding staking ecosystem where your tokens work hard to bring you consistent profits.

Earning potential through betting

Using advanced smart contracts powered by the Binance Smart Chain, Maine Coin moves beyond its meme coin origins into a dynamic asset with significant passive reward potential. Staking COON tokens allows you to tap into an area where your ownership goes beyond mere ownership and turns into a source of ongoing reward. And also, in the future, as a source of financial services in the application that our team is developing.

TOKENOMICS OF STAKING:

LOOK AHEAD.

Year 1: 7.50% (7,500,000,000 COON tokens)

In its first year, Maine Coin rewards early participants with a significant share of the staking pool. By contributing your tokens to the staking mechanism, you become an integral part of the security and growth of the network, while earning significant rewards. This encourages early participation and helps build a strong betting community. This initiative recognizes and values the loyalty and commitment of those who contribute to the growth of the network in its early stages.

Year 2: 2.50% (2,500,000,000 COON tokens)

In the second year, staking rewards will continue to be distributed, albeit at a slightly reduced rate. This sustainable approach will ensure that the staking ecosystem thrives and adapts to the evolving dynamics of the crypto landscape.

This approach ensures that the community continues to be rewarded for participation while also taking into account the evolving dynamics of the ecosystem.

Community Empowerment

Maine Coin's tokenomics structure is carefully designed to empower community members, investors and enthusiasts. Through smart token distribution and a sustainable staking mechanism, the project aims to create an ecosystem where active participation is rewarded and long-term sustainability is ensured.

Seamless betting experience

Interacting with the Maine Coin staking mechanism is simple and convenient. With intuitive interfaces and smart contracts, you can stake your tokens with ease, instantly becoming part of the network's growth story. When you stake, your COON tokens actively participate in network security and transaction verification, receiving rewards in return.

Community Empowerment

Maine Coin's staking mechanism is a testament to the project's commitment to its community. By participating in staking, you not only help strengthen the network, but also receive a reliable source of passive rewards. Over time, this betting ecosystem will continue to thrive, closing the gap between active participation and financial growth.

Seize the Opportunity: Steak and Prosper

Thanks to Maine Coin's staking mechanism, your tokens are no longer static assets; they become dynamic tools that work for you. By bidding and earning rewards, you live up to the project's ethos of innovation, community engagement, and the pursuit of value. Join the Maine Coin community and unlock the true potential of your tokens through staking.

DISCLAIMER

The information presented in this document relates exclusively to Maine Coin (COON), a unique crypto token inspired by the universe of meme coins and the creation of its own social network to provide protection and help to animals, and also includes online staking capabilities. Maine Coin was created to promote the principle of “Doing good every day.” It is important to note that Maine Coin (COON) is independent. This white paper does not constitute any form of financial advice or endorsement. As with any investment, there are inherent risks and individuals should conduct their own careful research before participating.

Our Maine Coin team does not guarantee the success of this project. But we guarantee to make every effort to implement it, as well as all the evidence that the funds will go to good causes to help animals in need!

In the future, the Whitepaper will be edited to add certain details and more specific information such as the legal aspects of the project. The Roadmap will also be changed after the completion of the private sale to set the dates for the completion of all work.

This will be reported.
